

WALK-IN RESCUE

PROVEN DESIGN. MAXIMUM PERFORMANCE.

E-ONE walk-in rescues are built to deliver exceptional versatility with maximum exterior compartment space and custom interior configurations giving you the power to perform effectively in the field.

E-ONE.COM

DURABILITY. VERSATILITY.

E-ONE engineers extruded aluminum and formed 304L stainless steel rescues that meet or exceed NFPA standards. With unsurpassed durability that will last the long haul, E-ONE rescues are built to meet the critical needs of your department without sacrificing safety or quality.

→ BUILT FOR THE TASK AT HAND

Available on single or tandem axle configurations, E-ONE rescues are custom built to your departments needs without compromises.

→ DURABLE INTERIOR THAT LASTS

Improve the functionality of your walk-in rescue with cabinets, counter tops and workspaces that withstand the rigors of the job and keep the right tools in the right place for quick deployment.

→ CUSTOM RESPONSE NEEDS

Customize the interior space around your departments specific needs with unique work spaces, crew seating, storage configurations and tool boards.
