

SCOUT 2.0

Art. No. 206319

Color: brown, leather/textile combination, waterproof and breathable with GORE-TEX® Extended, leg height 7 inch, antistatic, sole 016

Available sizes: US 5 – 14 & half sizes
Available widths: Medium & Wide

HAIX® Climate System

206319

Upper Material

A combination of soft and flexible leather, hydrophobic, breathable, 1.9 – 2.1 mm thick and nylon fabric.

Inner Lining

GORE-TEX® Extended; waterproof and very breathable. Highly abrasion-resistant lining with excellent climate comfort. Especially flexible for indoor and outdoor use and at warmer temperatures.

Plastic/non-woven inner sole

Moisture absorbent, anti-torsion design for outstanding stability, prevents penetration pressure from sharp objects (e.g. of stones).

Footbed

Comfortable, damping and moisture wicking. Moulded heel cup provides good cushioning and foot guidance.

Sole

Rubber/PU vibram sole with proven street/terrain tread, wear resistant and non-slip traction; optimum tread and rolling behaviour due to sporty toe and heel spring. Fuel-oil and heat resistance and non-marking characteristics. Excellent cold insulation.

HAIX® Absorption

Absorption with cushioning wedge which is built into the sole.

HAIX® Climate System

The HAIX® Climate system uses the pumping movement, which permits air circulation with every step – warm air is released through the Micro-Dry lining at the top of the boot leg.

HAIX® Anti Slip

Excellent grip on a variety of terrains, even in the cold due to specific outsole design and use of special rubber.

Others

Pulling strap, manually applied rubber sidewall on the front and back of the boot for a better durability, brown sole, antistatic.
