

SAFETY VARIO INSOLE

Available widths: Narrow / Medium / Wide

Upper material: Polyester fabric for moisture distribution. The distribution of the foot moisture on these fibers results in a faster transport and drying effect.

Mid-layer: Open-cell PU foam with high moisture absorption, with very good shock absorption over the entire sole area. Three different thicknesses = three different widths. (see below*)

Base layer: Half shell made of EVA material with stronger foam for heel to arch support.

Other: Embossed structures and channels on the top and bottom increase wicking and foot-support.

SAFETY VARIO

***EMS/Station and Police Line**

yellow = extra wide
red = wide
blue = medium

***Fire Line**

yellow = wide
red = medium
blue = narrow
