

Dräger X-plore® 1700 Particle Filtering Face Piece

Breathe cool, stay safe: Dräger X-plore® 1750 and 1760 is Dräger's new generation particle filtering face piece respirators, coming with distinct improvements in comfort and protection.

Benefits

CoolSAFE™ filter material

CoolSAFE™ filter material, produced from high-performance filter media, combines low breathing resistance and high filter performance in one mask. The CoolSAFE filter material provides effective protection against fine dust and particles, according to NIOSH 42 CFR 84 protection levels N95 and R95. An odor version with an active carbon layer to remove unpleasant nuisance organic odors below the permissible exposure limit (PEL) is also available.

Soft inner layer makes for comfortable wear

The inner layer material is not only soft and hypo-allergenic, but also repels moisture thanks to its hydrophobic properties, keeping breathing resistance consistently low when used for longer periods of time.

CoolMAX™ exhalation valve (optional)

Breathe easy and comfortably thanks to low breathing resistance. The specially engineered CoolMAX™ exhalation valve relieves humid and warm exhaled air, preventing heat build-up underneath the mask, allowing you to stay cool.

VarioFLEX™ head harness

This continuous loop head harness is constructed from a stable, elastic textile strap that is easily donned and doffed, creating comfort with minimal pressure. The soft, tear-proof elastic easily stretches to fit various head sizes and prevents hair entanglement.

Folded form and hygienic individual packaging

All Dräger X-plore® 1700s are flat-folded, saving space and making them easier to transport. Each facepiece is individually packed in a plastic bag, ensuring it stays clean and hygienic.

Secure sealing

Ergonomic shape, comfort nose pad, and flexible nose clip ensures a secure seal and great fit for various facial shapes.
